

## Additions/revisions to the 1995 IPCC Guidelines for National Greenhouse Gas Inventories

Sector <sup>1</sup>	Volume	Chapter/Section	Summary of additions/revisions <sup>2</sup>
<b>1. Energy</b>	Reference Manual (Volume 3)	Chapter 1, Energy	Main changes are : <ul style="list-style-type: none"> <li>assignment of GHG emissions from autoproducers to the sector where they were generated and not to the transformation sector (<i>revision</i>);</li> <li>development of a Tier 1 method for estimating non- CO<sub>2</sub> GHG and SO<sub>2</sub> emissions based on fuel consumption (<i>new</i>);</li> <li>development of a Tier 2 method for estimating emissions from aircraft (<i>new</i>);</li> <li>inclusion of default values for various types of traditional biomass fuels (<i>new</i>);</li> <li>clarification of the definition of National Navigation (the definition of International Marine Bunkers remains unchanged)</li> </ul>
	Workbook (Volume 2)	Module 1, Energy	
<b>2. Industrial Processes</b>	Reference Manual (Volume 3)	Chapter 2, Industrial Processes	New methods and default data for the estimation of emissions of direct greenhouse gases (CO <sub>2</sub> , CH <sub>4</sub> , and N <sub>2</sub> O) and SO <sub>2</sub> from: <ul style="list-style-type: none"> <li>mineral production;</li> <li>chemical industries;</li> <li>metal manufacture.</li> </ul> New methods and default data for the estimation of emissions of ozone precursors (NO <sub>x</sub> , CO, NMVOC) from : <ul style="list-style-type: none"> <li>chemical industries</li> <li>metal manufacture</li> </ul> New methods and default data for the estimation of emissions of halocarbons (PFCs, HFCs) and sulphur hexafluoride (SF <sub>6</sub> ) from metal manufacture, use and production. <ul style="list-style-type: none"> <li>Tier 1 (a): for bulk chemicals;</li> <li>Tier 1 (b): for bulk chemicals and chemicals stored in products;</li> <li>Tier 2 : product (containing PFCs, HFCs, SF<sub>6</sub>) lifetimes are taken into account.</li> </ul>
	Workbook (Volume 2)	Module 2, Industrial Processes	

<sup>1</sup> Chapter 3, "Solvents and other product use" has not been revised.

<sup>2</sup> A revision of an existing methodology or default data is referred to as a 'revision'. In cases where an additional method has been developed and default data provided, this is defined as 'new'.

**Table 1. Additions/revisions to the 1995 IPCC Guidelines for National Greenhouse Gas Inventories (continued)**

Sector <sup>1</sup>	Volume	Chapter/Section	Summary of additions/revisions <sup>2</sup>
<b>4. Agriculture</b>	Reference Manual (Volume 3)	Chapter 4: Agriculture, Methane Emissions from Rice Cultivation	<ul style="list-style-type: none"> <li>• Revised method and new default data for the estimation of Methane Emissions from Rice Cultivation uses:           <ul style="list-style-type: none"> <li>- internationally-agreed definitions of rice ecosystems (<i>revision</i>);</li> <li>- default data (e.g. seasonally integrated CH<sub>4</sub> emission factors (<i>new</i>));</li> <li>- scaling factors for CH<sub>4</sub> emissions factors relative to continuously flooded fields (without-organic amendment) (<i>new</i>).</li> </ul> </li> </ul>
	Reference Manual (Volume 3)	Chapter 4: Agriculture, Agricultural Soils and Manure Management	<ul style="list-style-type: none"> <li>• Additions and revisions include:           <ul style="list-style-type: none"> <li>• default method for the estimation of nitrous oxide emissions from Manure Management and Agricultural soils (<i>new</i>);</li> <li>• revised default emission factors for the estimation of direct emissions of N<sub>2</sub>O from soils (<i>revision</i>);</li> <li>• default data (e.g. N<sub>2</sub>O emission factors for animal waste and for indirect emissions) (<i>new</i>).</li> </ul> </li> </ul>
	Workbook (Volume 2)	Module 4 : Agriculture Agricultural Soils, Manure Management, and Methane Emissions from Rice Cultivation	<ul style="list-style-type: none"> <li>• Revised /new default data and classification are suggested for:           <ul style="list-style-type: none"> <li>- land-cover types (<i>revision</i>);</li> <li>- rates of forest conversion (<i>new</i>);</li> <li>- aboveground biomass for native tropical forests (<i>revision</i>);</li> <li>- rates of tropical forest regrowth (<i>revision</i>)</li> </ul> </li> <li>• Method for the estimation of CO<sub>2</sub> fluxes from agricultural soils (<i>revision</i>) and default data (<i>new</i>).</li> </ul>
<b>5. Land-use Change &amp; Forestry</b>	Reference Manual (Volume 3)	Chapter 5, Land-use Change & Forestry	
	Workbook (Volume 2)	Module 5, Land-use Change & Forestry	

<sup>1</sup> Chapter 3, “Solvents and other product use” has not been revised.

<sup>2</sup> A revision of an existing methodology or default data is referred to as a ‘revision’. In cases where an additional method has been developed and default data provided, this is defined as ‘new’.

**Table 1. Additions/revisions to the 1995 IPCC Guidelines for National Greenhouse Gas Inventories (continued)**

Sector <sup>1</sup>	Volume	Chapter/Section	Summary of additions/revisions <sup>2</sup>
<b>6. Waste</b>	Reference Manual (Volume 3)	Chapter 6, Waste	<ul style="list-style-type: none"> <li>● Solid waste disposal           <ul style="list-style-type: none"> <li>- Revised/new data and classification are listed below for:</li> <li>- solid waste disposal site classification: definition encompasses all sites classified in the current <i>Guidelines (revision)</i>;</li> <li>- methane correction factor to account for the methane generation potential of the site (<i>new</i>);</li> <li>- wider range of default data for waste generation, composition and disposal data (<i>revision</i>).</li> </ul> </li> <li>● Wastewater           <ul style="list-style-type: none"> <li>- revised approach and default data for calculating CH<sub>4</sub> emissions (<i>revision</i>).</li> </ul> </li> <li>● Human sewage           <ul style="list-style-type: none"> <li>- method and default data for the estimation of N<sub>2</sub>O emissions (<i>new</i>).</li> </ul> </li> </ul>

<sup>1</sup> Chapter 3, "Solvents and other product use" has not been revised

<sup>2</sup> A revision of an existing methodology or default data is referred to as a 'revision'. In cases where an additional method has been developed and default data provided, this is defined as 'new'.
